

Automotive

We have restarted our monthly meetings and a good number of members came along to our September gathering. We looked back on the last twelve months of activities. These ranged from classic car shows and scenic drives to motorsport events at Croft Circuit.

Two hardy souls made it to Knock Hill in Fife for the British Touring Cars Championship. A cracking day out at a twisting and turning circuit.

Our most popular outing was a tour of the Nissan final assembly plant in Sunderland, where we were happy to welcome members of the Science group. That was a fascinating and informative trip, a great insight into a modern factory.

Looking forward, we are contemplating outings to the Carlisle Air Museum, Solway Aviation Museum and Locomotion in Shildon. Drives to the Dales and Borders are likely too.

Our next meeting is at the usual venue , 10:30 to 12:00 on 15th October. Please let the group convenor know if you wish to join us. All group members are welcome. There may be a quiz!
