

## DISCUSSION GROUP

JUNE 2019

We were a small group this month and our discussion was limited to very few subjects: energy, solar panels, smart meters and the amount of hatred in the world.

Our main topic was **Going Cashless** and we were not in favour! We all use cash regularly, particularly for small items. Our local newsagent doesn't take cards, workmen often get paid in cash because business accounts have to pay for all transactions. It is also easier to keep track of your spending and avoid getting into debt when you have cash in hand. Some places are no longer accepting cash payments – London buses, and businesses in the London area mainly so far. However, another problem is that many cash machines are disappearing, also banks and post offices, so where will people be able to obtain any cash?

Our next meeting will be on Friday 12<sup>th</sup> July when our main subject for discussion will be **The Prison System**. New members are always welcome and if you would like to join us please give me a ring.
