

## **iPad and iPhone Group - March 2023**

We had an initial discussion on the risks of phishing calls, texts and emails and the likelihood of getting your money back if you fell for any of the scams.

Moving on, we looked at the controls of the phones and iPads. Simple you may say but aside from the obvious and up-front controls, Apple offers a number of more accessible ways of controlling the actions. We looked at the Assistive Touch facilities and the Magnifier app. There were new discoveries and some surprises along the way.

The next meeting will be on the 28<sup>th</sup> April. There may be a change of venue and I will email the details when they are known. Please contact me if you need details and have not heard before the next meeting.
