

iPad and iPhone Group Report – October 2023

Our security focus this month was Trustpilot. It is a useful source of information on businesses but it needs to be treated with care. Businesses often show their Trustpilot star rating on their web site and this may not be genuine. Always refer to the Trustpilot web site itself before making your decision.

Apple issued the latest update of its operating systems in September; we had a look at the new features for iPhone and iPad. Most people had not yet updated but it does no harm to wait a month or two as Apple always seem to need to iron out a few wrinkles.

There is a useful facility in Safari for securely remembering log in and card details for web sites called Autofill. Personal information is also held in Contacts and in Apple Store. We talked through the use of this information and the importance of making sure all these places are kept up to date.

The next meeting is on Tuesday 28th November at 1:30pm in Enterprise House (note that this address is also accessible from Montalbo Road and is just past Castle Vets)

There will be no meeting in December.
