

## NEEDLECRAFT

FEBRUARY 2024

This was our first proper meeting this year and we were all busy, mainly with crochet or knitting. Of course, whilst working, we are able to chat and pass on ideas etc. We spent quite some time discussing ways of overcoming slight imperfections in our work (sometimes known as fudging) which provided us with methods of salvaging potential disasters. Always useful to have such information! We also exchanged information about air fryers and modern microwaves. Technology moves so fast nowadays that it is good to learn about new developments.

Our next meetings will be on 4 March and (probably) 1 April. If you would like to join us please give me a call.
