

Wildflower Group Report for September

Our September walk was, again, a railway walk when nine of us identified 31 flowers along the Tees Railway from Mickleton towards Middleton-in-Teesdale.

The forecast rain did not materialise but we had a gentle breeze instead. We identified three Willow-herbs - Rosebay, Great and Broad-leaved; Harebells hiding in the undergrowth; Wild Raspberry; and Water Mint in the ditch.

A complete list of flowers identified was sent to the Group members.
